

Workshop 4 - Higher education and employment: building the connections

Camille Kandiko Howson,

King's Learning Institute, King's College, UK

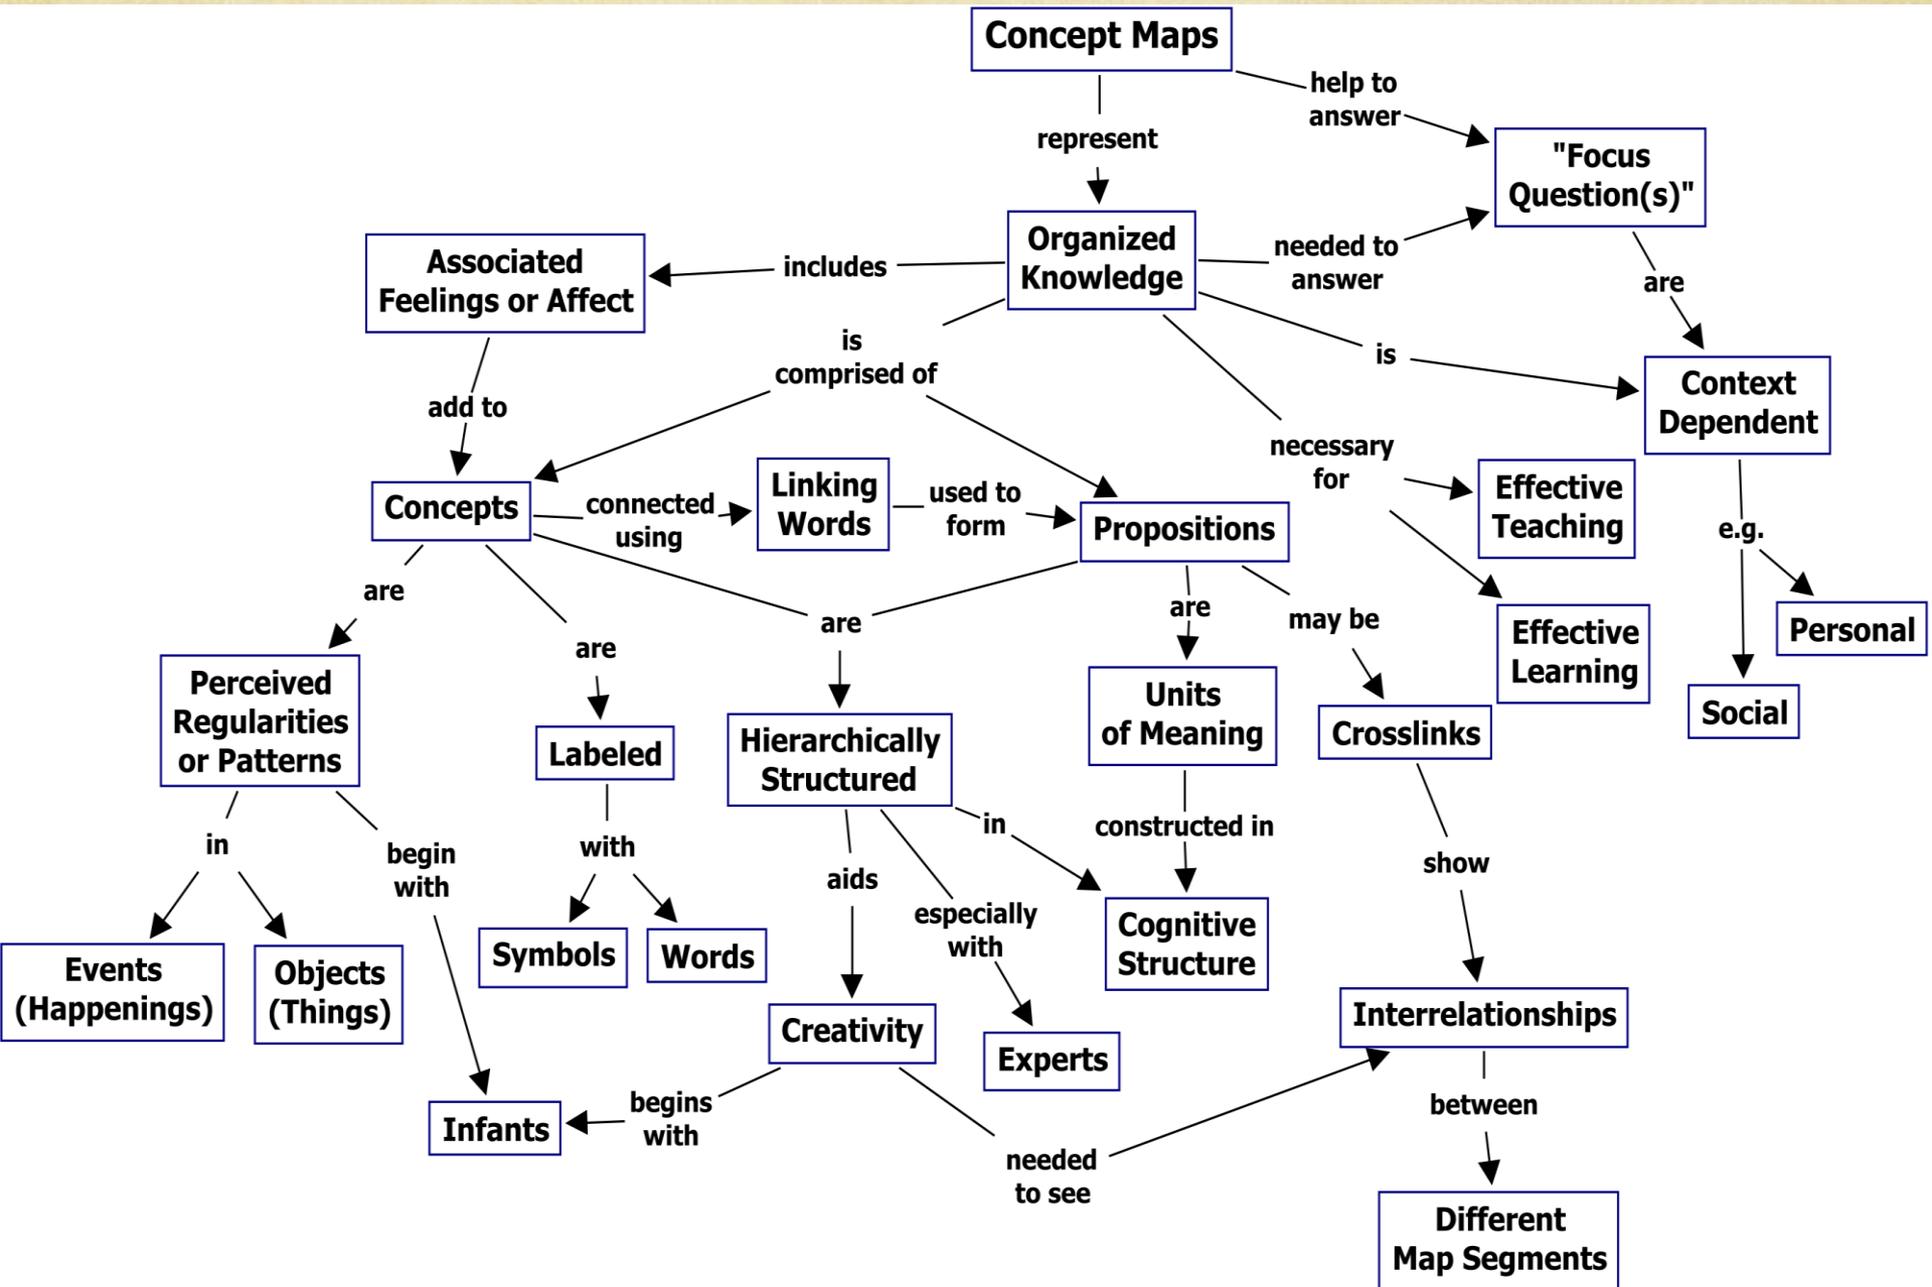

Mariana Gaio Alves,

Universidade Nova de Lisboa, Portugal

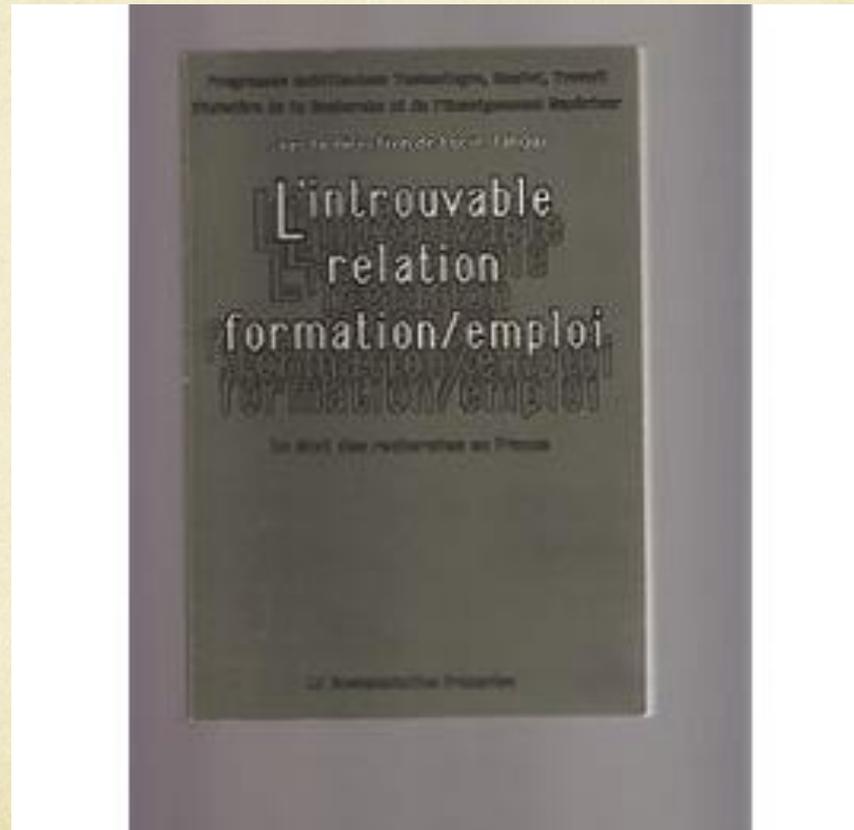

Porto – 1 September 2014

Concept Map Activity I

1. Draw a concept map of “graduates' employability”
1. Include the main issues, concerns and challenges about the topic

Higher education and employment: building the connections

Recent trends and concerns

- Bologna reform + focusing learning outcomes
- Privatization of HE institutions + students as consumers
- Are aspects of the Bologna process - such as its social dimension, the fostering of citizenship and democratic values - being neglected ?
- Is “over consumption” of education, credentials and credits in HE a massive strategy ? Is “inquisitive learning” being neglected?

Employability and educational policies

- Finding a balance between the “ivory tower” model and the “responding to the economic needs” model
- Finding a balance between aims of “qualification”, “socialization” and “subjectification”
- Developing adequate tools (data, variables, survey methods, ...) to monitor employability

Employability and individuals' trajectories

- The consequences of Bologna ?
- The consequences of the LLL European policies?
- The consequences of the economical crisis ?
- The consequences of new contexts of professional learning ?
- ??? ... ???

Are transitions between HE and employment more frequent and extended across all ages ?

Questions?

Mariana Gaio Alves

UIED - FCT/Universidade Nova de Lisboa

mga@fct.unl.pt

- Student expectations and perceptions of higher education:
Employability

The Project

Quality Assurance Agency (QAA) - funded research project explored the views of students in higher education across the UK in 2012-13, to investigate their perceptions and expectations of the quality of their learning experience and the academic standards of their chosen programmes of study

Methodology

- Concept-map mediated interviews and focus groups were used to elicit students' expectations and perceptions of quality, standards and the student learning experience
- Interviews and focus groups were conducted with over 150 students in 16 settings, across 4 general institutional types (research-intensive, teaching-intensive, regional-focused and special interest)

Analysis

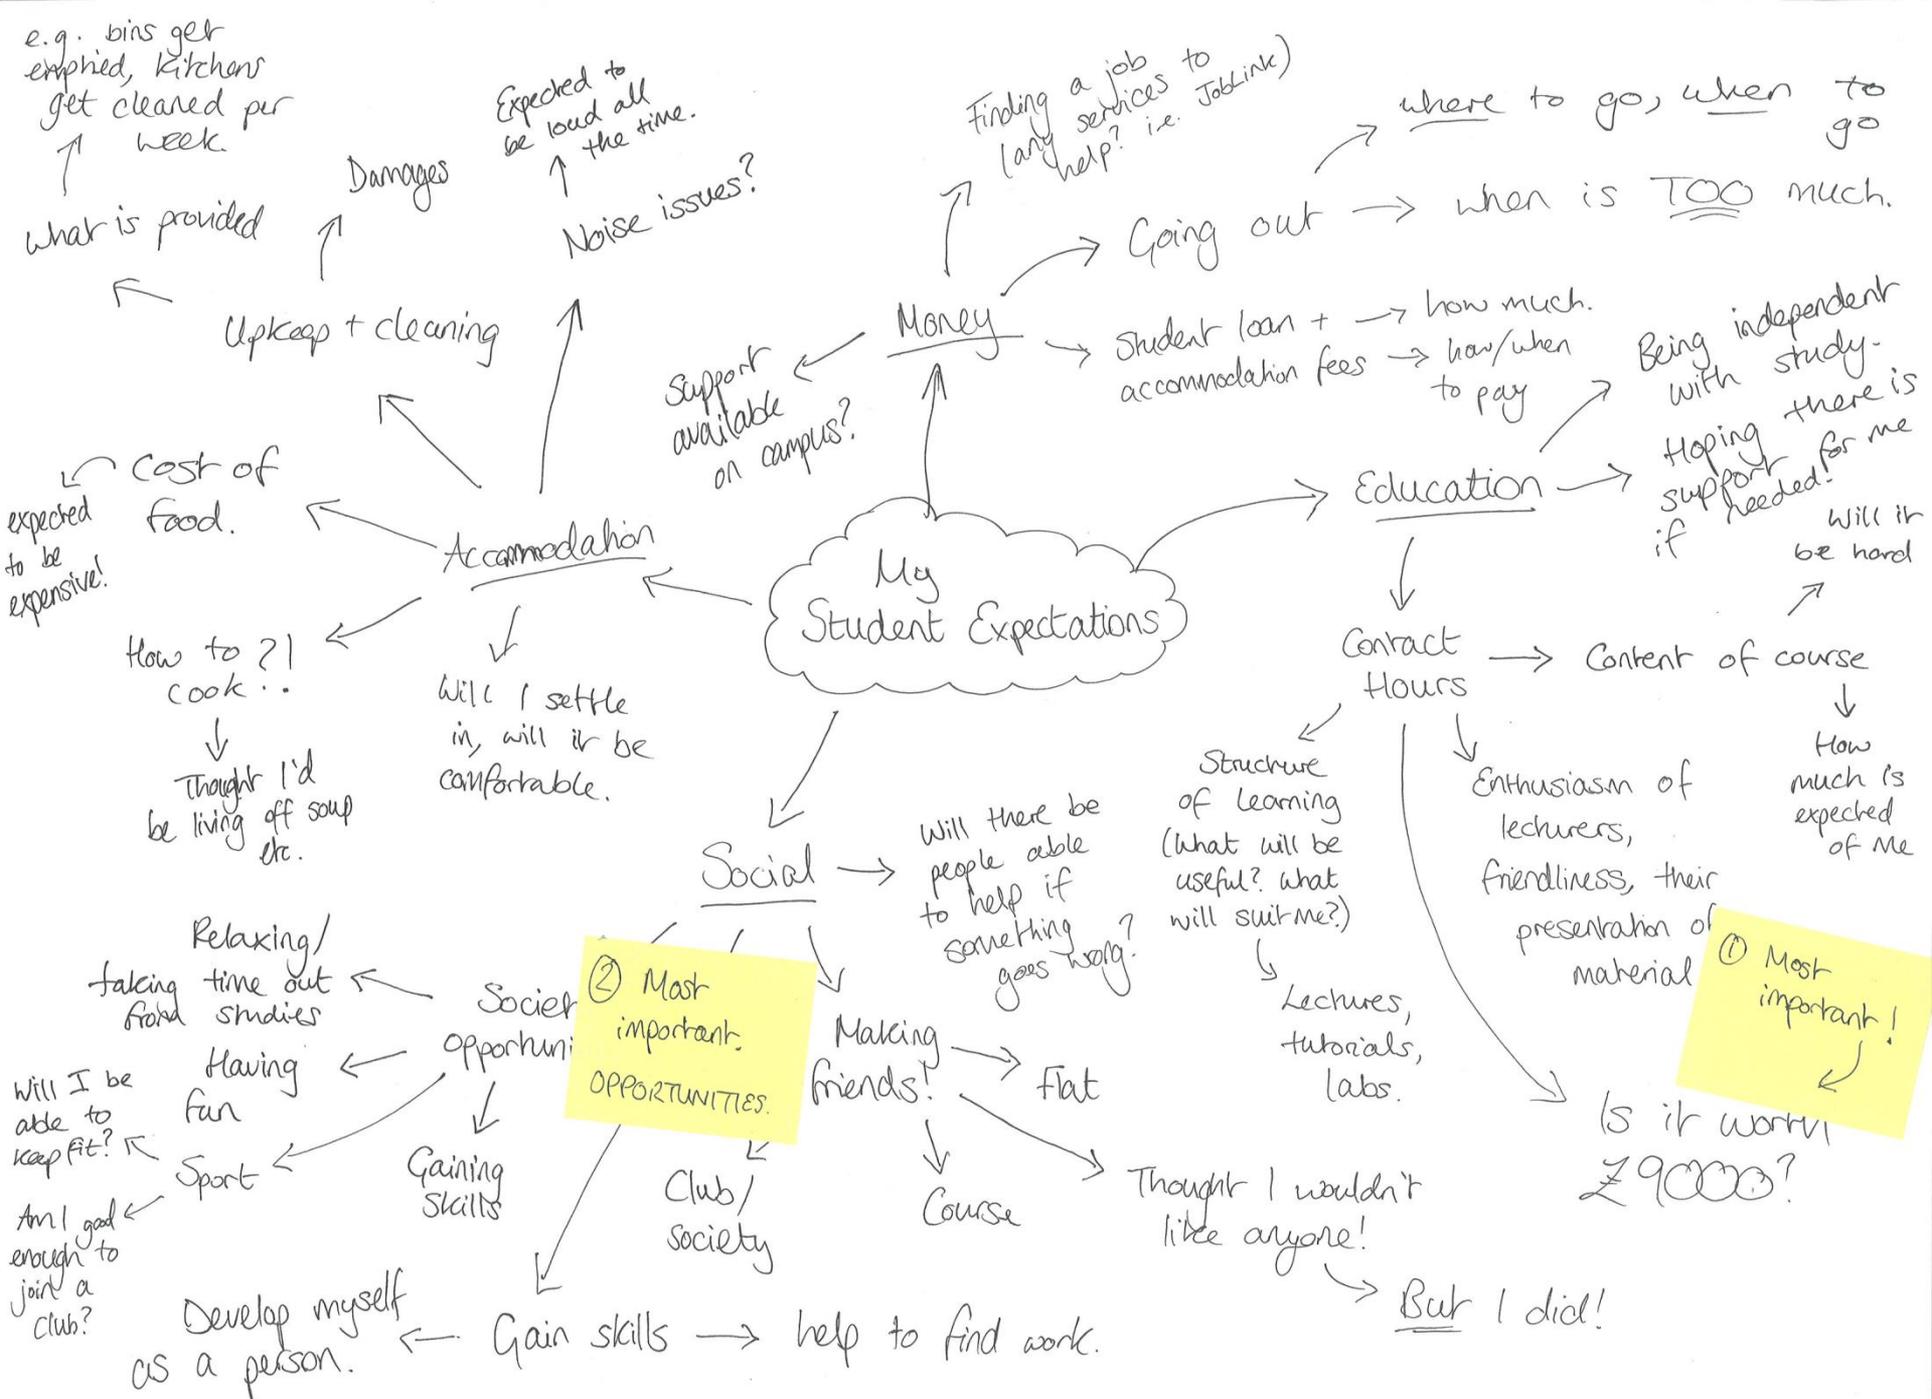

- Interview and focus group data were analysed through open-coding using a grounded theory approach, with codes combined into thematic areas
- Concept maps were analysed visually, structurally and thematically

Findings

- How students frame higher education
 - Ideology
 - Practices
 - Purpose
- Students and their course
- Students and the institution

I. Framing of ideology

Consumerist ethos: Student perceptions of value

II. Framing of purpose

Student expectations for employability

Advice and guidance

- Opportunities for internships, placements and work experience
- Promotion and coordination of student services and Student's Unions activities regarding employability and skills development

Questions?

Dr Camille B. Kandiko Howson

King's College London

camille.kandiko_howson@kcl.ac.uk

Research Assistant: Dr Matthew Mawer

Concept Map Activity II

1. Draw a second concept map about: researching graduates' employability
2. Include exploring what data is available, needed, what questions need to be addressed, what matters at individual, institutional, national and regional levels.
