

SRHE Annual International Research Conference 2021

Using Wonder.me

For social events, networking, and chats during the SRHE conference, we will be using the browser-based video chat site Wonder Me. Wonder allows you to mingle more naturally than Zoom as you are not constrained by a room controlled by a host. You are free to move among people as you wish.

Our SRHE Conference 2021 wonder.me space is accessible via this link and guest password:

Link: <https://app.wonder.me/?spaceId=e5e14aa1-de54-407d-8ef7-cd09448f1f97>

Guest password: conference2021

It is accessible at any time throughout the conference.

User guidelines

Once you have clicked the link to enter our wonder.me room, you will be prompted to enter your name and take a photo. After that, you will see everyone's profile photo on your screen.

Dragging your image towards another user's image (using your cursor or your arrow keys) will open a video chat between those people at the top of your screen. Those in a chat together will be framed by a circle on the main screen. When other users drag their images towards an ongoing chat, they will join that circle and be automatically added to the ongoing chat. A maximum of 14 people can join one of these circles, whereas the entire room has a capacity of 500.

You can click on another person's image to message them directly, or send them a direct invite to your group.

To leave a chat and join another, simply drag your image towards another user or group.

Please note that Wonder Me only works on Microsoft Edge, Google Chrome, and Firefox on desktops and laptops and is not well supported on other devices.
