

Bloomsbury Education and Childhood Studies is an online resource that offers a systematic and comparative look at key education levels and the study of cognitive and psychosocial development through early childhood and youth.

It is an essential tool for students to study, build an understanding of, and compare education systems, policies, and the nature of childhood and youth experience in different countries throughout the world.

OFFERING TWO COLLECTIONS

Core Collection - Allows students and scholars to study and compare topics and education systems from multiple countries, and includes teaching and learning tools which provide dynamic coverage and a global picture.

Comparative and International Education - This collection enables comparative study, and examines pressing issues in international education from early childhood to higher education - perfect for students and researchers looking for global perspectives on education
